

I am 26 years old and for many years, I have listened to country, rock, alternative, etc. but I like K-Love the best. I realized that when I listened to stations other than K-Love, I generally did not like what was going into my brain. Often, the message other stations send out is not positive-it is mean, racist, angry, or depressing. I do not have to worry about that when I listen to K-Love. I am a better person for listening to K-Love - it helps my days go better and my mood improves when I listen to K-Love. I know other people who also listen to and enjoy K-Love. If it is taken off the radio, many people will no longer have a radio station that we feel comfortable listening to and feel comfortable letting our kids listen to. The testimony from people about how listening to K-Love has drastically improved their lives makes me believe that keeping it on the radio is in the best interest of the public. I know my life is better because I listen to the uplifting songs and messages on K-Love, and I know other members of my community feel the same.
